Summary

Full Stack Software Engineer with **6+ years** building JavaScript/TypeScript, Meteor.js/React, MongoDB, and Node.js applications across configurable UI workflows, API-backed systems, and production reliability, with hands-on experience in AI-assisted development and building RAG-based AI systems using MCP, embeddings, and retrieval workflows.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, Java, C/C++
Frontend: React, Meteor.js, HTML, CSS, Tailwind CSS, Material UI
Backend/Data: Node.js, REST APIs, GraphQL, Kafka, MongoDB, PostgreSQL, Supabase, Redis
Cloud/DevOps/Testing: AWS Lambda, Docker, Vercel, Jenkins, CI/CD, Playwright, Cypress, Selenium
Tools: Git, GitLab/GitHub, Jira, Figma, Prometheus, Grafana, Humio, RAG, MCP, Embeddings, LLM Integration

Experience

Software Engineer | Fortress Information Security | Lewisville, TX — Jun 2023 - Apr 2026

- Introduced **MongoDB Atlas Search** for grids approaching **1M records**, preserving backward-compatible filters, sorting, and column-specific search while reducing query latency by approximately **35%**, from roughly **10 seconds to 6-7 seconds**
- Built a **RAG-based** internal AI chat assistant using a local **MCP server**, Python ingestion and chunking, **embeddings**, and a lightweight local JSON knowledge store to help users navigate product features and workflows
- Owned **4 new Business Objects** within a **20+ object** platform powering grids, surveys, automation, and messaging workflows
- Diagnosed a production **SlickGrid** reliability issue at **500K+** records using AI-assisted codebase analysis to narrow root cause across frontend and backend data flows, then resolved it by replacing MongoDB find queries with an aggregation pipeline
- Architected and delivered a Redis-backed, configuration-driven Custom Tabs subsystem used by **500+ users** across Business Object types, from Figma system-flow design through reusable runtime UI behavior
- Provided technical leadership to **4** junior engineers through pair programming and code reviews, cutting PR turnaround by **10%**

Associate Software Engineer | Fortress Information Security | Lewisville, TX — Jun 2021 - May 2023

- Owned the company-wide **ESLint** rollout across a roughly **1M-line** JavaScript codebase, introducing **60-70 rules** through a risk-managed migration with Husky/lint-staged commit gating and GitLab CI enforcement
- Coordinated a **20-member** team through **5 consecutive on-time sprints** without a dedicated Scrum Master
- Implemented Jest and React Testing Library unit/integration tests for validation, configurable UI behavior, and regressions

Full Stack Developer Intern | Merch | Lewisville, TX — Aug 2020 - May 2021

- Built frontend website and integrated APIs using WordPress, HTML, and CSS to enable storefronts for businesses
- Increased organic traffic by **20%** in **3 months** using topic clusters and SEO optimization, reducing load time to **3 seconds**

Programmer Analyst | Cognizant | Chennai, India — Jan 2018 - Nov 2018

- Optimized COBOL backend jobs for policy systems, improving execution time by **10%** in IBM Mainframe production

Projects

Resume Tailoring Workflow | TypeScript, Node.js, MCP, Local RAG, Playwright — GitHub

- Architected a 10-stage AI workflow spanning evidence-grounded analysis, PDF generation, evaluation, and outreach
- Built a TypeScript MCP server with MiniLM embeddings and local RAG for semantic retrieval and Playwright job extraction

Personal Portfolio Website | React, TypeScript, Python, FastAPI, Supabase — Portfolio

- Built a full-stack portfolio with an AI chat assistant, serverless contact form, and AWS Lambda-backed Projects REST API
- Engineered a Python FastAPI RAG service with Supabase pgvector and chunked ingestion for semantic retrieval

Lighthouse for LinkedIn | JavaScript, Chrome Extension, Manifest V3 — GitHub

- Engineered a Manifest V3 Chrome extension with side panel and background scans to automate recruiter discovery
- Built job intelligence workflows to capture job descriptions, metadata, tech stacks, fit scores, and repost signals

Education

Master of Science (Computer Science), University of Texas at Arlington | Aug 2019 - May 2021
Bachelor of Engineering (Computer Science and Engineering), Anna University | Jul 2013 - Apr 2017
