Summary

Full Stack Software Engineer with **6+ years** building JavaScript/TypeScript, Meteor.js/React, and Node.js applications across configurable UI workflows, API-backed systems, MongoDB performance work, and production reliability.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, Java, C/C++
Frontend: React, Meteor.js, HTML, CSS, Tailwind CSS, Material UI
Backend/Data: Node.js, REST APIs, GraphQL, Kafka, MongoDB, PostgreSQL, Supabase, Redis
Cloud/DevOps/Testing: AWS Lambda, Docker, Vercel, Jenkins, CI/CD, Playwright, Cypress, Selenium
Tools: Git, GitLab/GitHub, Jira, Figma, Prometheus, Grafana, Humio

Experience

Software Engineer | Fortress Information Security | Lewisville, TX Jun 2023 - Apr 2026

- Introduced **MongoDB Atlas Search** for grid views while preserving backward-compatible search, filters, and sorting, using optimized indexing and aggregation pipelines to cut query latency by **35%**
- Built a reusable bulk update workflow across multiple business objects, syncing changes with backend updates, database writes, and aggregation refreshes
- Resolved a severe **SlickGrid** performance issue handling **250K+** records by replacing multiple find queries with a MongoDB aggregation pipeline, restoring reliable grid behavior
- Engineered a configurable custom tabs system for **500+ users**, translating per-subscription settings into dynamic UI behavior with Redis-backed configuration retrieval
- Delivered real-time bidirectional messaging between an AWS-hosted platform and vendor portal using Meteor publish/subscribe
- Mentored **4** junior engineers through code reviews and maintainability standards, reducing PR turnaround by **10%**

Associate Software Engineer | Fortress Information Security | Lewisville, TX Jun 2021 - May 2023

- Coordinated sprint delivery for a **20-member** cross-functional team, maintaining on-time releases for **5 consecutive sprints**
- Optimized cyber risk processing with JavaScript/Meteor, Lodash-based UI components, and MongoDB query/indexing improvements, boosting performance by **15%**, reducing load time by **30%**, and lowering data retrieval latency by **40%**
- Implemented unit and integration tests for React/JavaScript features using Jest and React Testing Library, covering validation logic, UI behavior, and regressions

Full Stack Developer Intern | Merch | Lewisville, TX Aug 2020 - May 2021

- Built frontend website and integrated APIs using WordPress, HTML, and CSS to enable storefronts for businesses
- Increased organic traffic by **20%** in **3 months** using topic clusters and SEO optimization, reducing load time to **3 seconds**

Programmer Analyst | Cognizant | Chennai, India Jan 2018 - Nov 2018

- Optimized COBOL backend jobs for policy systems, improving execution time by **10%** in IBM Mainframe production

Projects

Resume Tailoring Workflow | TypeScript, Node.js, MCP, Local RAG, Playwright [GitHub](#)

- Architected a 10-stage AI resume-tailoring workflow spanning analysis, PDF generation, evaluation, and outreach
- Built a local RAG pipeline using MiniLM embeddings and cosine similarity to ground resume changes in evidence
- Developed a TypeScript MCP server for semantic evidence retrieval and Playwright-based job-posting extraction

Personal Portfolio Website | React, TypeScript, Python, FastAPI, Supabase [Portfolio](#)

- Built a full-stack portfolio with an AI chat assistant for interactive resume and project exploration
- Engineered a Python FastAPI RAG service with Supabase pgvector and a chunked ingestion pipeline for semantic retrieval
- Implemented a serverless contact form and Projects REST API using Supabase/PostgreSQL, Nodemailer, and AWS Lambda

LinkedIn Recruiter Finder | JavaScript, Chrome Extension, Manifest V3 [GitHub](#)

- Engineered a Manifest V3 Chrome extension with side panel and background scans to automate recruiter discovery
- Built job intelligence workflows to capture job descriptions, metadata, tech stacks, fit scores, and repost signals

Education

Master of Science (Computer Science), University of Texas at Arlington | Aug 2019 - May 2021

Bachelor of Engineering (Computer Science and Engineering), Anna University | Jul 2013 - Apr 2017
